108Mbps Cardbus Adapter

D-Link, the industry pioneer in wireless networking, introduces another performance breakthrough in wireless connectivity—the ***D-Link AirPlus Xtreme G***™ series of high-speed devices.

The D-Link *Air*Plus *Xtreme G* DWL-G650 Cardbus Adapter is a wireless cardbus featuring the very latest in advanced wireless silicon chip technology, including enhanced security to shield and protect your wireless communication from intruders. The DWL-G650 also works with 802.11b standard wireless devices and when used with other D-Link *Air*Plus *Xtreme G* products delivers throughput speeds capable of handling heavy data payloads.

With the enhancement of D-Link 108G, the DWL-G650 can achieve wireless speeds up to 15x faster than standard 802.11b in a pure D-Link 108G environment through the use of new wireless techniques such as Packet Bursting, FastFrame, Compression & Encryption, and Turbo mode. This provides a bandwidth large enough to handle video/audio streaming and Video on Demand (VoD) applications.

The DWL-G650 features WPA and 802.1X for wireless user authentication, providing you a much higher level of security for your data and communications than has previously been available in a wireless networking solution.

The D-Link *Air*Plus *Xtreme G* DWL-G650 also includes a configuration utility to discover available wireless networks and create and save detailed connectivity profiles for those networks most often accessed.

The DWL-G650 is a powerful 32-bit cardbus adapter that installs quickly and easily into laptop PCs, and when used with other D-Link *Air*Plus *Xtreme G* products, automatically connects to the network. Like all D-Link wireless adapters, the DWL-G650 can be used in ad-hoc mode to connect directly with other cards for peer-to-peer file sharing or in infrastructure mode to connect with a wireless access point or router for access to the Internet in your office or home network.
